

**Job Description:**

We are seeking a talented Angular Frontend Developer to join our dynamic team. As an Angular Frontend Developer, you will be responsible for developing and maintaining cutting-edge web applications using Angular framework. You will work closely with our backend developers and UI/UX designers to create seamless user experiences.

**Responsibilities:**

- > Develop responsive web applications using Angular framework.
- > Collaborate with backend developers to integrate frontend with server-side logic.
- > Implement UI/UX designs provided by the design team.
- > Optimize application performance for maximum speed and scalability.
- > Write clean, maintainable code and conduct thorough code reviews.
- > Stay up-to-date with the latest frontend development trends and technologies.

**Requirements:**

Bachelor's degree in Computer Science, Engineering, or related field.  
Proven experience as an Angular Frontend Developer or similar role.  
Strong proficiency in Angular, HTML5, CSS3, and JavaScript.
