

Oges Solutions Private Limited is a leading provider of innovative digital solutions for the upstream oil and gas segment. We are committed to help clients optimize operations and maximize profits through cutting-edge technology and services. Oges is seeking for a highly motivated and skilled Full Stack Developer to join our growing team and play a crucial role in driving our business growth.

### **Job Description:**

We are seeking a talented and experienced Full Stack Developer with strong hosting capabilities to join our dynamic team. The ideal candidate will be responsible for designing, developing, and maintaining robust web applications while also possessing the skills necessary to manage hosting environments.

### **Responsibilities:**

- > Design, develop, and maintain scalable web applications from concept to deployment.
- > Collaborate with cross-functional teams to define, design, and ship new features.
- > Ensure the responsiveness, performance, and security of web applications.
- > Build reusable code and libraries for future use.
- > Optimize applications for maximum speed and scalability.
- > Implement and maintain hosting solutions for web applications, including server setup, configuration, and management.
- > Monitor and troubleshoot hosting environments to ensure uptime and performance.
- > Collaborate with DevOps engineers to automate deployment processes and streamline infrastructure management.
- > Stay up-to-date with emerging technologies and industry trends.

### **Requirements:**

Bachelor's degree in Computer Science, Engineering, or a related field.

4-5 years of experience as a Full Stack Developer, with a strong emphasis on both frontend and backend development.

Proficiency in frontend technologies such as HTML, CSS, JavaScript, and modern JavaScript frameworks ( React, Angular, ).

Experience with backend technologies such as Node.js, Python, or similar.

Solid understanding of database technologies (SQL and NoSQL).
